SUBJECT INDEX TO VOLUME 22

A

- Acetylcholine receptors, induction of experimental autoimmune myasthenia gravis with using nonionic block copolymer as adjuvant, 267-282
- Adjuvant cancer immunotherapy, surgical, role of IL-2 responsive wound-infiltrating lymphocytes in, 13-23
- Adjuvant effect, of silicone-gel on antibody formation in rats, 151-161
- Adjuvants, nonionic block copolymer as, induction of experimental autoimmune myasthenia gravis with acetylcholine receptors using, 267-282
- Alphafetoprotein, human, cross species study of immunosuppressive effect of, 329-339
- Amino acid sequence, partial, of monoclonal extracellular antigen-specific T cell proteins, 541-552
- Aminoacylation, *in vitro*, inhibition of by RNA reactive antibodies, 117-126
- Amphipathic peptides, adsorption and coiling of on lipid vesicles, effect of on protection from cathepsin B or D, 25-40
- Antibodies
 - adjuvant effect of silicone-gel on formation of in rats, 151-161
 - anti-T cell receptor, effects of on development of type II collagen-induced arthritis in mice, 257-265
 - internalization of, cell membrane antigen-antibody dissociation by glycine-HCl method as procedure for studying, 1-12
 - mutual antagonism between antigen- and lipopolysaccharide-induced production of, 531-540
 - response of, against Epstein-Barr virus, HLA-B8,DR3 phenotype and, 41-51

- RNA reactive, inhibition of *in vitro* aminoacylation and translation by, 117-126
- Antigen-antibody complex dissociation, cell membrane, by glycine-HCl method, study of antibody internalization by, 1-12
- Antigenic cross-reactivity, between chicken and mammalian IgG applied to ELISA, 353-363
- Antigens
 - antibody production induced by, 531-540
 - HLA class I, as receptor for human coronavirus, 95-103
- Arthritis
 - psoriatic, immunogenetics of, 81-86
 - synovial mononuclear phagocytes in, 365-374
 - type II collagen-induced, effect of anti-T cell receptor antibodies on development of in mice, 257-265
- Autoantibodies
 - cross-reactive anti-DNA, characterization of in murine lupus, 229-248
 - to RI/SS-A and La/SS-B, relevance of in subacute cutaneous lupus erythematosus, 189-203
- Autoantigen, related to chymotrypsinogen, identification of in sera of diabetics, 219-227
- Autoimmune diseases, molecular pathology of (book review), 563-564
- Autoimmune mice, biosynthesis of CSF-1 by mesangial cells of, 249-255

B

- Block copolymer, nonionic, as adjuvant, induction of experimental autoimmune

[Block copolymer, *continued*]

myasthenia gravis with acetylcholine receptors using, 267-282

Books received, 405-406

C

Calcium, uptake of during mitogenic stimulation of human lymphocytes, 415-429

Cancer immunotherapy, surgical adjuvant, role of IL-2 responsive wound-infiltrating lymphocytes in, 13-23

Cathepsin B or D, effect of adsorption and coiling of amphipathic peptides on lipid vesicles on protection from, 25-40

CD8 expression, in CD4-CD8+ thymocytes, effect of *in vitro* stimulation on, 301-318

Cell membrane, antigen-antibody dissociation in, by glycine-HCl method, study of antibody internalization by, 1-12

Chymotrypsinogen, identification of autoantigen related to in serum of diabetic, 219-227

Colony stimulating factor (CSF), macrophage, effect of tumor growth on macrophage responsiveness to, 463-476

Colony-stimulating factor-1 (CSF-1), biosynthesis of by mesangial cells of autoimmune mice, 249-255

Complement, protection of *Escherichia coli* from killing of by potassium cyanide, 127-149

Coronavirus, human, HLA class I antigen as receptor for, 95-103

Cross species study, of immunosuppressive effect of human alphafetoprotein, 329-339

Cyclophosphamide, immunopriming of tumor infiltrating lymphocytes with, 87-93

Cytokines

modulation of transforming growth factor- β 1 effects by, 375-388

networks of, role of in tumor-induced suppression of CD4+ autoreactive t cells, 169-187

polyfunctional (book review), 483-484

role of in heat stroke, 553-561

suppression and potentiation of hapten-specific hypersensitivity responses induced by, 205-218

D

Dendritic cell populations, epidermal, 389-401

Diabetics, identification of autoantigen related to chymotrypsinogen in sera of, 219-227

E

Eicosanoids, role of in murine hypersensitivity pneumonitis, 341-352

Endothelial cells, rat microvascular, adherence of blood T cells to, 53-62

Enzyme-linked immunosorbent assay (ELISA)

antigenic cross-reactivity between chicken and mammalian IgG applied to, 353-363

for detection of human macrophage inflammatory protein-1 alpha and beta, 441-449

Epidermal dendritic cell populations, 389-401

Epstein-Barr virus, HLA-B8,DR3 phenotype and antibody response against, 41-51

Escherichia coli, protection of from complement killing by potassium cyanide, 127-149

F

Fluorometric assay, rapid microplate-based, for phagocytosis, 407-413

G

Glycine-HCl method, study of antibody internalization by cell membrane antigen-antibody complex dissociation by, 1-12

Growth factor- β 1 effects, transforming, modulation of by cytokines, 375-388

H

Hapten-specific hypersensitivity responses, cytokine-induced suppression and potentiation of, 205-218

Heat stroke, role of cytokines in, 553-561

- HLA-B8,DR3 phenotype, and antibody response against Epstein-Barr virus, 41-51
- Human leukocyte antigen (HLA) class I, as receptor for human coronavirus, 95-103
- Hypersensitivity pneumonitis, murine, role of eicosanoids and platelet activating factor in, 341-352
- Hypersensitivity responses, hapten-specific, cytokine-induced suppression and potentiation of, 205-218

I

- IL-2. *See* Interleukin-2 (IL-2)
- Immunochemical assays and biosensor technology (book review), 75-76
- Immunogenetics, of psoriatic arthritis, 81-86
- Immunoglobulin G (IgG), chicken and mammalian, antigenic cross-reactivity between applied to ELISA, 353-363
- Immunopriming, of tumor infiltrating lymphocytes with cyclophosphamide, 87-93
- Immunosuppressive effect, of human alpha-fetoprotein, cross species study of, 329-339
- Inflammation (book review), 167-168
- Inflammatory protein-1, human macrophage, ELISA for detection of, 441-449
- Interleukin-2 (IL-2)
 - effect of nitric oxide on secretion of from lymphocytes, 319-327
 - wound-infiltrating lymphocytes responsive to, role of in surgical adjuvant immunotherapy, 13-23

L

- Leukemia cells, rat basophilic CD45-deficient, isolation of, 503-515
- Lipid vesicles, adsorption and coiling of amphipathic peptides on, effect of on protection from cathepsin B or D, 25-40
- Lipopolysaccharides
 - antibody production induced by, 531-540
 - effect of macrophage-like cells stimulated by on plasmacytoma cells, 283-300
- Lupus erythematosus
 - murine, characterization of cross-reactive

- anti-DNA autoantibodies in, 229-248
- subacute cutaneous, clinical relevance of autoantibodies to Ro/SS-A and La/SS-B in, 189-203

Lymphocytes

- effect of nitric oxide on proliferation of and secretion of IL-2 from, 319-327
- human, calcium uptake of mitogenic stimulation of, 415-429
- tumor infiltrating, immunopriming of with cyclophosphamide, 87-93
- wound-infiltrating, IL-2-responsive, role of in surgical adjuvant cancer immunotherapy, 13-23
- See also* T lymphocytes

M

- Macrophage inflammatory protein-1, human, ELISA for detection of, 441-449
- Macrophage-like cells, lipopolysaccharide-stimulated, effect of on plasmacytoma cells, 283-300
- Macrophages
 - mouse peritoneal, treated with *Viscum album* extract, tumoricidal activity of, 431-440
 - responsiveness of to macrophage CSF, effect of tumor growth on, 463-476
 - role of in tumor-induced suppression of CD4+ autoreactive t cells, 169-187
- Mesangial cells, of autoimmune mice, biosynthesis of CSF-1 by, 249-255
- Mice
 - autoimmune, biosynthesis of CSF-1 by mesangial cells of, 249-255
 - effect of anti-T cell receptor antibodies on development of type II collagen-induced arthritis in, 257-265
 - in vivo* toxicity of ricin in, monoclonal antibody prophylaxis against, 63-72
- Microbial infections (book review), 403-404
- Microglial cells, murine, *in vitro*, effect of nitric oxide on toxoplasmatatic activity of, 487-501
- Microvascular endothelial cells, rat, adherence of blood T cells to, 53-62
- Mitogenic stimulation, of human lymphocytes, calcium uptake during, 415-429
- Monoclonal antibodies, as prophylaxis against *in vivo* toxicity of ricin in mice, 63-72

Mononuclear phagocytes, synovial, in rheumatoid arthritis and osteoarthritis, 365-374

Myasthenia gravis, experimental autoimmune, induction of with acetylcholine receptors using nonionic block copolymer as adjuvant, 267-282

N

Neuropathogenic viruses and immunity (book review), 77-78

Nitric oxide

effect of on lymphocyte proliferation and secretion of IL-2, 319-327

effect of on toxoplasmatatic activity of murine microglial cells *in vitro*, 487-501

O

Ovalbumin, analysis of responsive cells in tolerance by oral administration of, 451-462

P

Peanut agglutinin (PNA) lectin, separation of thymocytes based on, into mature and immature subpopulations, 517-529

Peptides, amphipathic, adsorption and coiling of on lipid vesicles, effect of on protection from cathepsin B or D, 25-40

Peritoneal macrophages, mouse, treated with *Viscum album* extract, tumoricidal activity of, 431-440

Phagocytes, synovial mononuclear, in rheumatoid arthritis and osteoarthritis, 365-374

Phagocytosis, rapid microplate-based fluorometric assay for, 407-413

Phenotypes, HLA-B8,DR3, and antibody response against Epstein-Barr virus, 41-51

Plasma, effect of on T lymphocyte activation, 105-116

Plasmacytoma cells, effect of lipopolysaccharide-stimulated macrophage-like cells on, 283-300

Platelet activating factor, role of in murine

hypersensitivity pneumonitis, 341-352

PNA. *See* Peanut agglutinin (PNA) lectin

Pneumonitis, murine hypersensitivity, role of eicosanoids and platelet activating factor in, 341-352

Potassium cyanide, protection of *Escherichia coli* from complement killing by, 127-149

Proteins, monoclonal extracellular antigen-specific T cell, partial amino acid sequence of, 541-552

Pseudomonas aeruginosa, as opportunistic pathogen (book review), 477-478

Psoriatic arthritis, immunogenetics of, 81-86

R

Rat basophilic leukemia cells, CD45-deficient, isolation of, 503-515

Rats, adjuvant effect of silicone-gel on antibody formation in, 151-161

Receptors, for human coronavirus HLA class I antigen as, 95-103

Renal disease, immunological effects of (book review), 163-164

Responsive cells, in tolerance, analysis of by oral administration of ovalbumin, 451-462

Rheumatoid arthritis, synovial mononuclear phagocytes in, 365-374

Ribonucleic acid (RNA) reactive antibodies, inhibition of *in vitro* aminoacylation and translation by, 117-126

Ricin, *in vivo* toxicity of in mice, monoclonal antibody prophylaxis against, 63-72

RNA. *See* Ribonucleic acid (RNA) reactive antibodies

S

Serum, effect of on T lymphocyte activation, 105-116

Silicone-gel, adjuvant effect of on antibody formation in rats, 151-161

Surgical science and practice, immunological basis of (book review), 165-166

Synovial mononuclear phagocytes, in rheumatoid arthritis and osteoarthritis, 365-374

T

- T cell proteins, monoclonal extracellular antigen-specific, partial amino acid sequence of, 541-552
- T cell receptors, effect of antibodies to on development of type II collagen-induced type II arthritis, 257-265
- T cells
 - blood, adherence of to rat microvascular endothelial cells, 53-62
 - CD4+ autoreactive, role of macrophages and cytokine networks in tumor-induced suppression of, 169-187
- Thymocytes
 - CD4-CD8+, effect of *in vitro* stimulation on CD8 expression in, 301-318
 - PNA lectin-based separation of into mature and immature subpopulations, 517-529
- T lymphocytes, effect of plasma and serum on activation of, 105-116
- Tolerance, analysis of responsive cells in by oral administration of ovalbumin, 451-462
- Toxicity, *in vivo*, of ricin in mice, monoclonal antibody prophylaxis against, 63-72
- Toxoplasmatatic activity, of murine microglial cells *in vitro*, effect of nitric oxide on, 487-501
- Transforming growth factor- β 1 effects, modulation of by cytokines, 375-388
- Translation, *in vitro*, inhibition of by RNA reactive antibodies, 117-126

- Tumor growth, effect of on macrophage responsiveness to macrophage CSF, 463-476
- Tumoricidal activity, of mouse peritoneal macrophages treated with *Viscum album* extract, 431-440
- Tumor infiltrating lymphocytes, immunoprimering of with cyclophosphamide, 87-93
- Tumors, role of macrophages and cytokine networks in suppression of CD4+ autoreactive t cells induced by, 169-187

V

- Vaccines, genetically engineered (book review), 479-481
- Virology reviews (book review), 73
- Viruses, Epstein-Barr, HLA-B8,DR3 phenotype and antibody response against, 41-51
- Viscum album* extract, tumoricidal activity of mouse peritoneal macrophages treated with, 431-440

W

- Wound-infiltrating lymphocytes, IL-2-responsive, role of in surgical adjuvant cancer immunotherapy, 13-23

Statement of Ownership, Management and Circulation

(Required by 39 U.S.C. 3685)

1A. Title of Publication Immunological Investigations	1B. PUBLICATION NO.							2. Date of Filing 10/1/93
	7	2	2	-	9	1	0	
3. Frequency of Issue Seven times a year in Jan., Mar., May, June, Aug., Oct. and Dec.	3A. No. of Issues Published Annually 7							3B. Annual Subscription Price \$575.00
4. Complete Mailing Address of Known Office of Publication (Street, City, County, State and ZIP+4 Code) (Not printers) Marcel Dekker Inc., P.O. Box 5005, Monticello, NY 12701								

5. Complete Mailing Address of the Headquarters of General Business Offices of the Publisher (Not printer) Marcel Dekker Inc., 270 Madison Ave., New York, NY 10016-0602

6. Full Names and Complete Mailing Address of Publisher, Editor, and Managing Editor (This item MUST NOT be blank)	
Publisher (Name and Complete Mailing Address) Marcel Dekker Inc., 270 Madison Ave., New York, NY 10016-0602	
Editor (Name and Complete Mailing Address) Carel J. van Oss, Ernest Witebsky Center for Immunology, School of Medicine, State Univ. of NY at Buffalo	
Managing Editor (Name and Complete Mailing Address)	

7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given. If the publication is published by a nonprofit organization, its name and address must be stated.) (Item must be completed.)

Full Name	Complete Mailing Address
Marcel Dekker	270 Madison Ave., NY, NY 10016

8. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages or Other Securities (If there are none, so state)

Full Name	Complete Mailing Address

9. For Completion by Nonprofit Organizations Authorized to Mail at Special Rates (DMM Section 424.12 only)
The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes (Check one)

<input type="checkbox"/> (1) Has Not Changed During Preceding 12 Months	<input type="checkbox"/> (2) Has Changed During Preceding 12 Months	(If changed, publisher must submit explanation of change with this statement.)
--	--	---

10. Extent and Nature of Circulation (See instructions on reverse side)	Average No. Copies Each Issue During Preceding 12 Months	Actual No. Copies of Single Issue Published Nearest to Filing Date
A. Total No. Copies (Net Press Run)	682	680
B. Paid and/or Requested Circulation	None	None
1. Sales through dealers and carriers, street vendors and counter sales		
2. Mail Subscription (Paid and/or requested)	373	375
C. Total Paid and/or Requested Circulation (Sum of 10B1 and 10B2)	373	375
D. Free Distribution by Mail, Carrier or Other Means Samples, Complimentary, and Other Free Copies	91	90
E. Total Distribution (Sum of C and D)	464	465
F. Copies Not Distributed	218	215
1. Office use, left over, unaccounted, spoiled after printing		
2. Return from News Agents	None	None
G. TOTAL (Sum of E, F1 and 2—should equal net press run shown in A)	682	680

Hutgasse 4, Postfach 812, CH-4001 Basel, Switzerland
Tel. 061-261-8482

This timely reference addresses the important aspects of the chemistry of the macrolides, azalides, and streptogramins; illustrates how the compounds are related; and details what structural changes are essential to achieve improved antibacterial activity and pharmacology.

Explains the in vitro activity of the new agents and compares them to other compounds used to treat outpatient infections!

Presenting the proceedings of the first international conference on the topic, *The New Macrolides, Azalides, and Streptogramins*

- discusses the intracellular activity of azalides and new macrolides against Chlamydia, *Staphylococcus aureus*, *Listeria monocytogenes*, *Legionella* species, etc.
 - demonstrates the potential uses of clarithromycin, roxithromycin, and azithromycin through animal models
 - reviews the safety of the newly developed macrolides and macrolide-like antibiotics and summarizes drug interactions
 - describes the use of macrolides for treating respiratory infections, skin and skin structure infections, sexually transmitted diseases, and gastrointestinal infections
 - contains clinical trial findings of eight macrolides used to treat significant infections in children
 - considers the use of macrolides to manage difficult-to-treat conditions associated with HIV infection
 - reveals the dramatic results of using clarithromycin in combination with minocycline to clear lepromatous lesions
- ... and much more!

The New Macrolides, Azalides, and Streptogramins serves as an excellent source for infectious disease specialists and pulmonologists, internists, pharmacologists and pharmacists, microbiologists, pediatricians, epidemiologists, and medicinal and biological chemists.

See over for contents ➤

The New Macrolides, Azalides, and Streptogramins CONTENTS

Structure and In Vitro Activity

Structure and Activity, *André Bryskier, Constantin Agouridas, and J. F. Chantot*

In Vitro Activity Against Gram-Positive and Gram-Negative Bacteria, *Jacques Acar and Fred W. Goldstein*

In Vitro Activity Against *Mycoplasma* spp. and Intracellular Organisms, *Geoffrey L. Ridgway*

Resistance to Macrolides, Azalides, and Streptogramins, *Roland Leclercq and Patrice Courvalin*

Intracellular Activity, *Paul M. Tulkens*

Animal Models, Pharmacology, Toxicity, and Drug Interactions

Animal Models, *Michael Barza*

Pharmacology, *Hartmut Lode, M. Boeckh, Tom Schaberg, Klaus Borner, and Peter Koeppe*

Toxicity and Safety of Macrolides and Azalides, *S. Ragnar Norrby*

Drug Interactions with Macrolide Antibiotics, *Ron E. Polk*

Clinical Applications

Clinical Use in Adults, *Harold C. Neu*

Clinical Use in Pediatrics, *Dieter Adam*

Changing Patterns of Infection in Neutropenic Patients: Implications for New Therapeutic and Prophylactic Approaches, *Stephen H. Zinner*

Clinical Applications in the Treatment of HIV Infection, *Merle A. Sande*

Otitis Media, *Jerome O. Klein*

Sinusitis and Pharyngitis, *Jerome O. Klein*

Bronchitis, *Hiroyuki Kobayashi*

Bacterial Pneumonia, *Claude Carbon and Ethan Rubinstein*

Infections Due to *Mycoplasma pneumoniae* and *Chlamydia pneumoniae*, *Margaret R. Hammerschlag*

Legionella Infection, *Victor L. Yu*

The Use of Macrolides for the Treatment of Lyme Borreliosis, *Benjamin J. Luft*

Skin and Skin Structure Infections, *George A. Pankey*

Osteomyelitis, *Layne O. Gentry*

Chancroid, *Mark W. Tyndall, Egokin Malisa, J. O. Ndinya-Achola, Francis A. Plummer, and Allan R. Ronald*

Sexually Transmitted Chlamydial Infections, Gonorrhea, and Syphilis, *H. Hunter Handsfield*

Gastrointestinal Infections, Including *Campylobacter*, *Helicobacter*, and *Cryptosporidium*, *Harold C. Neu*

Toxoplasma gondii, *Fausto G. Araujo and Jack S. Remington*

Antimycobacterial Activity, *Lowell S. Young, Clark B. Inderlied, and Luis E. Bermudez*

Other Intracellular Infections, Including *Brucellosis* and *Lep-tospirosis*, *Emilio Bouza*

Poster Rapporteurs' Summaries

Review of Posters at the First International Conference on the Macrolides, Azalides, and Streptogramins

In Vitro Activities, *Takeshi Yokota*

Animal Models, Pharmacology, Toxicity, and Drug Interactions, *Stephen H. Zinner*

Clinical Indications: Otitis Media, Sinusitis/Pharyngitis, Bronchitis, Pneumonia (Bacterial), *Mycoplasma/Chlamydia pneumoniae*, *Legionella*, and Lyme Disease, *Ethan Rubinstein*

Clinical Indications: Skin and Soft Tissue Infections of Staphylococcal or Streptococcal Etiology, *Lowell S. Young*

ISBN: 0-8247-9038-3

This book is printed on acid-free paper.

**Infectious Disease and Therapy* is a series of individual volumes under the general editorial direction of Brian E. Scully, M.B., B.Ch., and Harold C. Neu, M.D., College of Physicians and Surgeons, Columbia University, New York, New York.

IMMUNOLOGICAL INVESTIGATIONS

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPTS FOR DIRECT REPRODUCTION

Immunological Investigations is a bimonthly journal of Molecular, Cellular, and Clinical Immunology.

DIRECTIONS FOR SUBMISSION

One manuscript suitable for direct reproduction and two copies of the manuscript must be submitted to the Editorial Office.

REPRINTS

Owing to the short production time for articles in this journal it is essential to indicate the number of reprints required upon notification of acceptance of the manuscript. Reprints are available in quantities of 100 and multiples thereof, in addition to the twenty (20) free copies provided to the senior author with orders of 100 or more reprints; a reprint price list will be sent to the senior author with the notification of acceptance of the manuscript.

Manuscript should be mailed to:

Editorial Office, The Ernest Witebsky Center for Immunology
207 Sherman Hall, School of Medicine
State University of New York at Buffalo
Buffalo, New York 14214
Telephone: (716) 829-2900; Fax: (716) 829-2158

INSTRUCTIONS FOR THE PREPARATION OF MANUSCRIPTS

Since all contributions are reproduced by direct photography of the manuscripts, the following instructions must be strictly adhered to. Non-compliance will result in the return of the manuscript to the author(s) and delay in its publication.

TYPING INSTRUCTIONS

1. Manuscripts must be typewritten, $1\frac{1}{2}$ spaced, on good quality white bond paper measuring at least $8\frac{1}{2}$ x 11 inches.
2. Use a black typewriter ribbon. Errors may be corrected by using white opaque correcting fluids or tapes.
3. The typing area of page 1, including the title, should be $6\frac{1}{4}$ x $8\frac{1}{2}$ and that of all other pages $6\frac{1}{4}$ x $9\frac{1}{2}$.
4. Tables should be typed as part of the text but in such a way as to separate them from the text by a three line space at both top and bottom. The title TABLE (capitalized and followed by a Roman number) should precede the table and be centered.
5. Draw graphs and other numbered figures in black ink on a separate piece of white paper. Photographs should be glossy prints. Type legends or figures single spaced on a separate sheet, along the full width of the page.

The indication FIGURE should be capitalized and, with the figure's number (in Arabic numerals), centered above the legend. Indicate the top of the picture on the back. Indicate with blue pencil in the text where the picture(s) should be inserted.

6. Number the references (including footnotes) in the text consecutively by numbers in parentheses. Collect the references (and footnotes) at the end, as follows:

(*journal*): S. G. Trasher, N. Dorosczak and S. Cohen, J. Immun., 107, 1394-1401 (1971).

(*book*): D. Pressman and A. L. Grossberg, The Structural Basis of Antibody Specificity. Benjamin, New York, (1968) pp. 25-32.

(*article in book*): F. Milgrom, in International Convocation on Immunology, Vol. 1., N. Rose and F. Milgrom, eds. Karger, New York, (1969) pp. 270-277.

FORMAT OF MANUSCRIPTS

1. The title should be capitalized and centered, at least two inches from the top of the page. This is followed by a one-line space and by the name(s) and address(es) of the author(s) as follows:

AUTOMIMMUNE RESPONSES TO THYROGLOBULIN IN RATS

T. Atkins and Z. Ginsberg
Departments of Microbiology and Pathology
School of Medicine, State University of New York at Buffalo
Buffalo, New York 14214

2. Then, after a three line space, follows the abstract, comprising less than 10% of the length of the text of the article. It must be typed single spaced and headed ABSTRACT.

3. After a three line space follows the article itself, whenever possible subdivided into sections such as: MATERIALS AND METHODS, RESULTS, DISCUSSION, ACKNOWLEDGMENTS and REFERENCES. The headings should be centered and separated by one extra line space from the typed material that precedes and follows it.

4. Each page of manuscript should be numbered lightly at the bottom of the sheet, with a blue pencil.
